

## Release registration online

As a new facility for record companies holding a standard contract NCB has developed a web application – WebCover – that simplifies your NCB registration of new releases over the Internet.

WebCover replaces NCB's existing 'Cover' program as well as all paper forms for release registration.

## Open 7/24

You can access WebCover 24 hours a day all week – consequently, you can make your release registrations whenever it fits into your schedule.

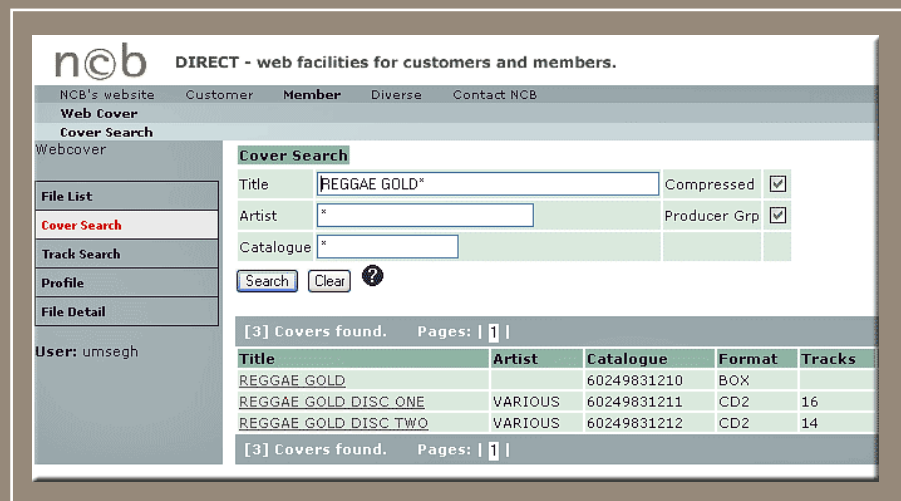

# NCB launches

WebCover ensures swift and easy NCB registration of your new releases. It offers a variety of features that makes registration uncomplicated – e.g. re-use of track information.

WebCover gives you access to one of the world's most comprehensive music databases and it contains information on hundreds of thousands of Nordic and international releases (CD/LP/DVD) – including information on track titles, album titles, artists, composers, catalogue numbers etc.

WebCover offers you

- a full index of your back catalogue – including recordings that you released years ago
- search facilities that extend to releases made by other Nordic record companies – the most recent as well as the very old ones

## Get access today

NCB provides you with a personal password to WebCover's database – on condition that you register your audio releases in WebCover.

Contact NCB – Gunnar Hovgård – e-mail: [gh@ncb.dk](mailto:gh@ncb.dk) – and get access today!

# WebCover

Linna B. Strøyer – Elap:

"WebCover is so much more user-optimized that the previous registration program. It's easy to locate tracks and entire albums – your own releases as well as those by other record companies.

Do I need to say how time-saving that is for a company like ours that markets re-releases."

Marcus Norell – V2 Music Scandinavia:

"WebCover is not only very easy to use, it also gives you access to one of the worlds most comprehensive databases of recorded music"
